

ANUJ DEOL - SOFTWARE DEVELOPER (TORONTO, CANADA)

☎ +1(437) 533-3030 ✉ anujdeol007@gmail.com 🌐 [linkedin.com/in/anuj-deol](https://www.linkedin.com/in/anuj-deol) 🐙 github.com/anujdeol

SUMMARY

- Experienced in developing object-oriented, client/server, distributed, web-centric, and cloud applications.
- Proficient in the MERN/MEAN stack (MongoDB, Express.js, React.js, Node.js, Angular 17), demonstrated through recent projects and integration work, enhancing front-end and back-end components.
- Showcased strong project implementation skills using both core and advanced Java technologies (JAVA/J2EE/JDBC, Spring Boot, Microservices (REST), Web Services [SOA]).

SKILLS

Frameworks: Node.js, Spring Boot, Django, React, Angular 17, Next.js, Serverless.

Programming Languages: Java, JavaScript, Python, TypeScript, Object-oriented programming (OOP), HTML/CSS.

Cloud services: AWS (Lambda, S3 Buckets, API Gateway, CloudFront, SNS Webhook, IAM), Google Cloud Fire-base.

Database Management: MongoDB, SQL, PL/SQL, PostgreSQL.

Technologies and tools: Okta OAuth 2.0/Auth0, JIRA, Agile methodology, Postman, Docker, Jenkins, Swagger.

EXPERIENCE

Coding Instructor

Sept 2024 - Present

Code Ninjas

Toronto, Canada

- Designing and delivering interactive lessons using the Microsoft MakeCode integrated Impact platform (JavaScript), and C# with Unity, Python and Java OOP programming, teaching young learners coding fundamentals through engaging, project-based activities.
- Guiding students in building skills in problem-solving, logic, and computational thinking through game development projects and hands-on exercises, fostering a passion for technology and laying a strong foundation for their future exploration in tech.

Software Developer Intern

Jan 2024 - April 2024

Fable

Toronto, Canada

- Developed and tested Node.js APIs using a Serverless framework, and implemented automated testing using Jest, which led to a 15% reduction in bug occurrences. Additionally, API integration with a Figma plugin for enhanced design collaboration.
- Facilitated asynchronous communication through integration with Fable Engage, allowing teams to access and utilize video clips showcasing real-world accessibility challenges.
- Successfully developed and integrated Okta Auth0 security feature within the Figma plugin ecosystem.
- Experience integrating and customizing front-end development with APIs for Web Chat / Live Chat using AWS and Amazon Connect
- Deployed AWS infrastructure meticulously, leveraging code repository-stored configurations (Serverless).
- Designed the Figma plugin frontend using React components, following the Figma documentation for seamless integration.

Backend Software Developer - Client: Walgreens USA

Nov 2020 - July 2022

Tata Consultancy Services (TCS)

Noida, India

- Optimized the logistics system to handle 50K daily API requests with 99.9% uptime by fine-tuning Spring Boot RESTful APIs, using indexing and caching with Redis to improve database query performance and system reliability.

- Designed APIs that dynamically allotted slot locations based on product types, with role-based overrides for flexibility. I also implemented consolidated shipment logic, which reduced processing time by 15
- I led a team of 3 junior developers, mentoring them on best practices and reviewing their code. Additionally, I automated testing and streamlined deployments using JUnit, Mockito, Jenkins, and Maven, cutting deployment time by 30
- Ensured seamless backend/frontend integration by closely collaborating with frontend developers to enhance user experience and system usability.
- Implemented JWT authentication for secure API access and automated testing using JUnit and Mockito, reducing deployment time by 30% through CI/CD pipelines with Jenkins and Maven.

PROJECTS

Cottage Booking Backend Server:

Developed a backend server using Node.js, Express, and Mongoose with RESTful APIs and MVC architecture. Integrated with Next.js app for dynamic data rendering and implemented security features like AuthO 2.0, session management, and Nodemailer for secure communication.

Java E-Commerce Web App:

Built a dynamic e-commerce website using Spring Boot, Thymeleaf, and Hibernate ORM for backend logic and session management. Developed RESTful APIs for product catalogues, carts, and orders. Designed user-friendly interfaces with Spring MVC, featuring secure authentication and seamless checkout.

MovieFlex:

Developed a web application using Next.js for seamless movie exploration, leveraging server-side rendering (SSR) to enhance SEO and load times. Built a modular and scalable architecture, integrating the TMDB API for real-time movie data, including ratings and trailers. Improved user experience with dynamic routing, pagination, and search functionality.

EDUCATION

Post-Graduation, Information Technology Solutions, Humber College	Sept 2022 - April 2024
Bachelor of Computer Science, Galgotias University	Sept 2016 - April 2020
